Management of Thoracolumbar Burst Fractures

Friday, March 2 – Saturday, March 3, 2018
Specialty Education & Research Center (SERC)
Burr Ridge, IL (Chicago suburb)

Chair: Timothy A. Moore, MD
Co-Chair: Paul A. Anderson, MD
CME Committee Liaison: Chris Steyn, MD

Optimal treatment of thoracolumbar burst fractures is extremely variable. Despite reliable classification systems, nonoperative versus operative and surgical approaches to these injuries are widely debated. This course describes classifications, factors that affect treatment, nonoperative principles and various surgical techniques to these injuries. Unique to this course is the incorporation of geriatric fracture care and fractures in pathologic bone. The faculty consists of spine traumatologists who are academic faculty dedicated to state of the art fracture care. Participants will learn through didactic lectures, case presentations and hands-on surgical techniques in the lab.

Upon completion of this course, participants should gain strategies to:
- Summarize present accepted thoracolumbar classification system;
- Differentiate between non-operative and operative injuries;
- Apply learned surgical techniques to clinical practice.

Credits
The North American Spine Society designates this live activity for a maximum of 12 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Day 1: Friday, March 2, 2018

7:00 a.m. Registration
Continental Breakfast

7:20-7:30 Welcome
Timothy A. Moore, MD

7:30-8:20 Thoraco-Lumbar Classification
TBD

8:20-8:30 Discussion
8:30-9:20  Factors that Affect Treatment  
*Timothy A. Moore, MD*

9:20-9:30  Discussion

9:30-10:05  Burst Fractures: Operative vs. Nonoperative  
*Alpesh A. Patel, MD*

10:05-10:15  Discussion

10:15-10:30  **Break and transition** from auditorium to lab
