## ABOUT THE SUMMER SPINE MEETING

### Dear Exhibitors,

Welcome to the North American Spine Society's Summer Spine Meeting, featuring a dynamic educational program that addresses some of the most pressing issues in spine care today. We hope you will find the informal and relaxed setting of the meeting the perfect forum to participate in open discussions and debates about the latest in spine care.

Summer Spine is a smaller meeting in a casual atmosphere for greater discussion and collaboration, featuring symposia, debates and case-based presentations on timely spine care topics from a multidisciplinary perspective, including a new day-long pre-course covering the rapidly evolving field of spinal biologics.

The field of spinal biologics is rapidly evolving as patients, researchers, and clinicians are recognizing its potential to treat challenging painful conditions. While the roles of both nonoperative and surgical treatment are relatively well-defined in the algorithm of spine care, the indications, risks, and concerns regarding biologics for a variety of spinal conditions have not been agreed upon. Because of the differences in regulatory pathways for many of these products, the availability of data is variable making administrative decision-making difficult. This meeting will bring together exciting minds from academia and industry to discuss the pertinent technologies and relevant issues in biologics use for spinal conditions.

The NASS Summer Spine Meeting is a very different kind of meeting offering exhibitors an opportunity to share current information and concepts related to spine care. We hope you will join us for a rewarding and productive meeting.
