Daniel Resnick, MD, MS Named President of the North American Spine Society

ORLANDO, FL—Wisconsin neurosurgeon Daniel Resnick, MD, MS was named president of the North American Spine Society (NASS) Board of Directors during the organization’s 32nd annual meeting.

“I am proud to lead NASS because it is dedicated to improving outcomes across the spectrum of spine care,” said Dr. Resnick. “NASS has a significant voice in this process and I am proud to represent NASS at meetings with agencies such as the CMS and the FDA, funding agencies such as the Patient-Centered Outcomes Research Institute, and on Capitol Hill, where our input has made a real difference in patient care.”

Dr. Resnick is currently Professor, Vice Chairman, and Residency Program Director of Neurosurgery at the University of Wisconsin. He is a graduate of Princeton University and received his medical training from the University of Pennsylvania. Dr. Resnick did his residency training in neurosurgery at the University of Pittsburgh where he also earned a Master of Science degree in Neuroscience. He has authored and co-authored approximately 200 peer-reviewed publications, 100 chapters, five books, and 60 evidence-based clinical practice guidelines related to disorders of the spine. He is a principle investigator in several prospective trials evaluating the clinical and economic efficacy of common spinal treatments. Dr. Resnick’s subspecialty within neurosurgery is spine surgery and his academic interest is in the development and application of evidence-based spine care.

Dr. Resnick is director of the NASS registry effort and previously served numerous other roles in NASS, including Director of the Research Council, Secretary, and Vice President. He is past chair of the American Association of Neurological Surgeons/Congress of Neurological Surgeons Joint Section on Disorders of the Spine, Past President of the Congress of Neurological Surgeons, and is a Director of the American Board of Neurological Surgery.

“The aspect of NASS that I most value is its multidisciplinary membership and mission,” said Dr. Resnick. “I have learned so much from exposure to and interaction with colleagues with different training backgrounds and these lessons have helped shape my practice in neurosurgery.”

More than 3,000 spine professionals will meet at the NASS 32nd Annual Meeting in Orlando, October 25-28, 2017 at the Orange County Convention Center to share the latest information, innovative techniques and procedures, best practices and new technologies in the spine field. NASS is a multidisciplinary medical organization dedicated to fostering the highest quality, evidenced-based and ethical spine care by promoting education, research and advocacy. NASS is comprised of more than 8,000 members from several disciplines, including orthopedic surgery, neurosurgery, physiatry, neurology, radiology, anesthesiology, research and physical therapy. For more information, visit www.spine.org, NASS Facebook and NASS Twitter.
